Detailed Action

This is Office Action corresponds to amendment filed Oct 17, 20005. The application contains 7 claims numbered 14-20, claims 1-13 have been cancelled.

Drawings

The objection to the drawings is withdrawn at the moment.

Claim Rejections - 35 USC § 112

The 112 first paragraph rejection is withdrawn at the moment.

Claims 14-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

This is the second 112 rejection on this application. The claims are still indefinite enough to prevent the use of prior art. Applicant is responsible to review the claims in total since the examiner may not be addressing all the problems. Claim 14, line 3, “circumferential edge bend with a L-shaped edge plate” is confusing (this implies that an L-shaped edge plate is used to bent the circumferential edge of the base plate; in line 6, “locking hole” appears to be - - locking holes - -, or - - a locking hole - -; in lines 7 and 8, what is the limitation?, where is the screw hole (line 8), on the adjustable plate?, or on the bottom end of the adjustable plate?;

Art Unit: 3632

in line 9, the clause "L-shaped steel" is not understood, the mixing of the shape and the material does not appear to make sense, also no proper antecedent is found for "the upright side plate", does Applicant mean that the suspension plate has an L-shaped configuration defined by an upright side plate and a horizontal side plate?

Claim 15 is not understood.

Claim 16, no proper antecedent is found for "the various corners of the base plate".

Claim 17, no proper antecedent is found for "the top plate".

Claim 18 is not understood; it is the horizontal plate the one defined as having adjusting holes, not the upright plate.

Claim 19 is not understood; the horizontal plate is defined as having a plurality of holes, not just one.

Claim 20 is not clearly understood; how a line can have holes?

Conclusion

This action is not made final in order to give Applicant on more opportunity to present claims in condition for examination. If the 112 problems persist the next action would be made final.
